9170 First Street, P.O. Box 247 Baroda, MI 49101

Phone: 269.422.2812 Fax: 269.422.1873

E-mail: [sales@select-tool.com](mailto:sales@select-tool.com)

## Select Services:

- Design prototypes; design, build, repair, and maintain aluminum, zinc, and magnesium die cast dies
- Build fixtures for machining, assembly, and CMM inspection
- Low and high volume production machining of components and castings
- Engineering Changes
- Die and Mold Repairs
- Core pin replacement
- Service and maintenance of die cast dies
- Prototype tooling
- Fixtures for production machining
- Fixtures for CMM inspection

## Select Tool & Die, Inc.

primarily designs and builds aluminum and zinc die cast dies for 25-ton to 1200-ton machines. We offer 40 years combined experience building die cast dies for our customers.

Located in Southwest Michigan, we strive to maintain 100% on-time completion of all projects while achieving the highest level of quality. Our goal is to provide a high quality tool at a fair, competitive price. Simultaneously, we expect to attain sufficient profitability to continually invest in new and better equipment and technology necessary to fill our customer's needs.

We are capable of working on die cast dies that run in 25-ton machines up to 1200-ton

capacity machines and under 10,000 pounds per half. We understand that manufacturing and delivering products to your customer can be a 24-hour / 7 day per week service. To help you with these needs, we offer around the clock pickup and delivery and work with our customers to meet manufacturing schedules.

Select Tool & Die, Inc. utilizes CAD/CAM systems to tool path CNC milling machines. In addition, Select utilizes manual milling and turning equipment and works off part prints as needed. We also create 3D models from part prints and offer complete CMM inspection of tools as needed.

Select Tool & Die has CAD/CAM capabilities to fit your designing and engineering needs.

Call us for all of your die cast tooling and tooling repair needs.

## Capabilities and Equipment:

- 1 seat Surfcam 2001 CAD/CAM system
- 1 seat Surfcam Design Plus solid modeling
- 3 Vertical Machining Centers with load capacity to 3500 pounds and 40" X 24" travel
- 1 Hurco Hawk 5M CNC Mill
- 3 Bridgeport vertical mills, 1 with Troyke turntable
- 2 Chevalier vertical mills with Troyke turntables
- 1 KF 12 Deckel duplicator
- 2 ELOX EDM machines
- 1 horizontal mill
- 1 Wilton radial arm drill press
- Various surface and cutter grinders, lathes, saws and cranes
- Lifting capabilities to 10,000 pounds
- Material Handling capabilities to 5 tons
- Several trucks and trailers for dependable on-time delivery
- Polishing Equipment
